Company Profile

GROUP ELASTRON

ELASTRON Company was established in 1958 as A. KALPINIS - N. SIMOS. With over 50 years of activity in the steel industry, our company has achieved to be a leader in the Greek steel industry. ELASTRON S.A. is one of the major processors and resellers regarding the steel products in the Greek market. What is more, ELASTRON has achieved strong and long term relationships not only in the domestic markets but in international, as well.

The experience of over one half of a century in import, process and commerce of steel products, steel plates, iron and other metal products meets the state-of-the-art processes and the sophisticated technology. The wide range of our products and the capability to meet the special requirements and needs of our customers, have provide us a strong competitive advantage among our competitors. Furthermore, the cooperation with the international well known Group TATA, has enhanced **ELASTRON's Group** dynamics by combining our credibility and innovation with the international experience that Group TATA holds.

OUR PHILOSOPHY

The fundamental principle for all of us in **ELASTRON Group** is to become a part of a greater whole, with our common objectives being the quality, the progress and the sustainable growth, that can be achieved through team work.

Under this principle we:

- remain leaders offering innovative products and services
- always operate according to the needs and the demands of our clients
- have achieved to be distinct in our industry
- seek to achieved constant harmony between our activity and the environment
